

## **Standard of Care # 5: Biological Safety Cabinet (BSC) Warranty Work**

### **Guideline**

Revision Date: 05/17/22

---

### **Scope**

---

BSC manufacturers can request to have EHS Biosafety Technicians perform warranty work on their BSCs at the University of Michigan. This will often greatly reduce the time a cabinet is out of service due to scheduling delays seen with outside certification and maintenance companies.

### **Stipulations**

---

- EHS can decline the work for any reason including scheduling, unfamiliarity with the manufacturer or model, and unfamiliarity with the maintenance to be performed.
- The BSC manufacturer must provide training to EHS Biosafety Technicians periodically and when requested on new or modified products.
- All parts required for the repair will be provided to EHS free of charge under warranty, including shipping charges.

### **Warranty Work Fee Schedule**

---

Typical warranty work may require decontamination, repair and/or certification services. All required work will be billed according to the following rates:

- Photometer, smoke generator, flow hood, velometer, and standard tool usage are included in the hourly fee.
- Materials used for the service work will be billed at current prices.
- Mileage will not be billed to facilities on the main Ann Arbor campus. Offsite locations will be billed at the rate of \$0.585 per mile to and from Ann Arbor, MI. Any airfare, hotel, and meal expenses will be billed at cost plus 10%.
