

Preparing Solid Biohazardous Waste that Will Not Puncture the Skin for Collection

Standard Operating Procedure

Revision Date: 06/13/18

Use this procedure for solid biohazardous waste that will not puncture the skin **and only** when the waste stream cannot be treated using the autoclave.

Examples of this Stream

- Plastic
- Pipettes
- Syringes without needles
- Petri dishes
- Culture flasks
- Gloves

When NOT to Use this Procedure

If the waste contains sharps, then follow the procedure [Preparing Biohazardous Sharps Waste for Collection](#).

Supplies Available through Hazardous Materials Management

Hazardous Materials Management provides the following supplies. To order these supplies, call (734) 763-4568 or complete the online [Waste and Supply Request](#) form.
