**ALL types of light bulbs MUST be recycled properly!**

**WHAT BULBS ARE ACCEPTED?**

All types and sizes of bulbs are accepted in the EHS Hazardous Materials Management (HMM) bulb collection/recycling program. Under no circumstances should any bulb be discarded into the general trash.

**PROPER PACKAGING & LABELING**

All bulbs should be carefully packaged to prevent breakage. Repackage bulbs in original boxes, if possible, and close and seal both ends. New boxes or drums are available for pickup at the Bulb Trailer and at EHS’s North Campus Transfer Facility (NCTF) at 1655 Dean Road, 763-4568.

Bulbs must be kept in a secure, dry location. All bulb boxes and drums must have a “Bulb Label” affixed to the container. Fill out the label, including the “Accumulation Start Date.” The accumulation start date is the first day that you begin filling the container with bulbs.

**DISPOSAL**

**Zone Maintenance:**
Transport bulbs to the Bulb Trailer located in the northeast corner of the Transportation Lot (inside the fenced area). Bulbs can also be transported to EHS’s North Campus Transfer Facility. Make certain all containers are closed, sealed, and labeled properly.

**Faculty and staff:**
Contact Zone Maintenance for pick-ups at 647-2059.
