

**APPENDIX D**

**University of Michigan Contractor Confined Space Entry Notification**

In compliance with MIOSHA Parts 90 & 490, when the contractor's work may involve entry into permit required confined spaces, the University of Michigan must notify the contractor and inform them of the hazards associated with these spaces.

In the scope of this project, the workplace contains confined spaces and entry is allowed only through compliance with a confined space entry program. Prior to entry, the contractor must submit a copy of their confined space entry program to the Department of Environment, Health & Safety (EHS).

**Specific Location of the Permit Required Confined Space(s) e.g., building, street, cardinal direction, type of space, etc.:**

---

---

**Atmospheric Hazards (existing or potential):**

- Oxygen (O2) content less than 19.5% or greater than 23.5%
- LEL greater than 10%
- Hydrogen sulfide (H2S)
- Carbon monoxide (CO)
- Other toxic gases or vapors
- Combustible dusts
- Work induced hazards, e.g., welding, hot work, painting the use of chemicals, etc.

**Health and Safety Hazards:**

- Mechanical
- Electrical
- Engulfment
- Entrapment
- Slip / Trip / Fall
- Fire/Burn
- Heat Stress or Cold
- Other (specify) \_\_\_\_\_

Describe any precautions U-M will utilize to protect nearby U-M staff:

---

Will U-M personnel also be working in the confined space?  Yes  No  
*If "yes", a meeting to coordinate entry activities is required.*

At the conclusion of the entry operations the contractor is required to discuss with the U-M representative the procedures followed and any hazards found or created during entry operations. Copies of permits used will be given to this representative and forwarded to EHS, 1239 Kipke Drive, 48109-1010, Attn: Operational Health & Safety.
