

Norovirus Prevention

Fact Sheet

Issue Date: 12/20/17

Revision Date: 01/08/18

Applies To: University of Michigan departments preparing to prevent outbreaks of norovirus

Norovirus is an infectious gastrointestinal illness with symptoms of vomiting, diarrhea, nausea and stomach pain. It is the number one cause of diarrhea and vomiting outbreaks. Therefore, cleaning common touch surfaces with a product that is proven effective for killing Norovirus is essential.

Suggested Areas for Disinfection

Up to 82% of the cases are transmitted through direct contact with an infected person or touching contaminated surfaces.
