GENERAL MACHINE SAFETY	YES	NO	NA	COMMENTS
Machinery installed/mounted to prevent unintentional				
movement or tipping				
A brush is available to remove stock shavings and chips				
Materials, scrap, and debris properly contained				
Machinery located so that operators do not stand in an				
aisle or interfere with the operation of other				
equipment				
Powered electrical equipment has an on-off switch				
Actuating controls are guarded or located to prevent				
accidental actuation, and precautions have been taken				
to prevent a machine from automatically restarting				
upon the restoration of power after a power failure				
A red emergency stop device is provided where the				
machine workstation is remotely located from the				
machine controls				
GENERAL MACHINE SAFETY	YES	NO	NA	COMMENTS
Actuation of the controls requires continuous				
depressions during the hazardous portion of the				
machine cycle where the machine workstation is				
remotely located from the machine controls				
ELECTRICAL SAFETY	YES	NO	NA	COMMENTS
All electrical service cords are in good condition				
Electrically powered machines are grounded				
All electrical receptacles within 6-feet of water source				
have working GFCI protection				
Extension cords are not used as a permanent source of				
electricity				
HOUSEKEEPING/HAZARD COMMUNICATION	YES	NO	NA	COMMENTS
Storage areas are free of accumulations of materials				
that constitute a hazard from fire, explosion or pest				
harborage				
Working dust collection system to minimize materials &				
debris around cutting, drilling & milling equipment				
All safety cans are red in color				
All emergency stop devices on machines (except				
cables) are red in color				
Physical hazards are marked with yellow or yellow with				
black stripes				
Unobstructed 3-foot aisle maintained between				
machines				
Chemicals are properly labeled, and stored in				
designated area(s)				
Appropriate safety signs, labels, tags & other postings				
are displayed in applicable areas				

SHEET METAL SHEAR	YES	NO	NA	COMMENTS
Blade and hold down clamp guarded by a fixed barrier				
or automatic clamps set within ¼-inch of the				
table/stock				
Pusher stick being used prior to shearing small pieces				
of stock				
Point of operation guard is in place				
Employee tending the backside is separated from the moving parts				
BUFFER		NO	NA	COMMENTS
Guard positioned 180 degrees from the wheel				
Adjustable deflector, of at least 16 gauge metal or				
equal material, ¼-inch from the wheel face				
CUT-OFF SAW (Horizontal/Vertical)	YES	NO	NA	COMMENTS
Saw blade totally enclosed & guided at the point of				
operation				
TABLE SAW	YES	NO	NA	COMMENTS
Appropriate anti-kickback device with a				
spreader/splitter				
Blade/hood guard over the blade that maintains				
contact with cutting stock				
SHEET METAL BRAKE	YES	NO	NA	COMMENTS
Point of operation guard is in place				
Point of operation guard is in place
