

Hydraulic Press				
Machine Owner	Worksite			
Surveyor's Name	Date of Survey			
Supervisor's Name	Room Name or No.			
Machine Manufacturer				
Model #	Serial No.			
Supply Voltage	No. of Supply Phases (Circle One) 1 or 3			
Horsepower	Full Load Amps			
1. Does the machine have a method of protecting the operator from ejected components?				
2. Does the machine have a method of protecting the operator from crush hazards on all sides of the point of operation?				
3. If the machine is foot actuated, is the foot pedal or switch covered to protect from unintentional operation?				
4. Is the frame and bed rated for the tonnage of the hydraulic pressing cylinder?				
5. Are all hydraulic hoses and fittings properly rated for the application?				
6. Does the machine have all OEM knobs, rods, or handles?				
7. Are the electrical system, wires, and plug ends acceptable?				
8. Does it have a system that will prevent automatic restart after power outage? (Power outage protection)				
9. Does the machine have a compliant start/stop pushbutton controls and a latching, red, mushroom shaped, emergency stop pushbutton for the pump motor?				
10. Can the machine be securely isolated from its power source?				
11. Is the work light properly protected against impact and shatter resistant?				
12. Does the machine have a high-friction coating at the operator's position on the floor?				
13. Is the machine secured to prevent moving or tipping?				
14. Are there any noticeable leaks in the hydraulic system?				

Notes
