Overview

Vaccines are an important and effective component of our efforts to protect the campus community. This policy is subject to change as the COVID-19 pandemic and public health guidance continues to evolve and will be regularly reviewed as public health guidance dictates.

Policy

**COVID-19.** Beginning in fall 2023, all U-M students residing in Michigan Housing on the Ann Arbor campus are required to have received a single dose of bivalent COVID-19 vaccine. U-M continues to allow for medical and religious exemptions to the COVID-19 vaccination.

**Other vaccinations.** All U-M students residing in Michigan Housing on the Ann Arbor campus beginning in fall 2023 are required to submit documentation showing whether they are vaccinated for the following vaccinations in line with the CDC immunization schedule:

- Measles, mumps, and rubella (MMR) vaccine
- Meningococcal A (MenACWY) vaccine
- Polio vaccine
- Tetanus, diphtheria, and pertussis (Tdap) vaccine
- Chicken pox/varicella vaccine

U-M students who are not vaccinated with the above five (5) vaccinations are required to submit an attestation that states that they are not vaccinated and understand they may be subject to additional public health protocols should there be a public health need.

The requirements in this policy are in addition to other vaccination requirements that may be applicable to faculty, staff, and students by their school, college, unit or third-party partners.

U-M recognizes only vaccines that are approved or authorized for emergency use by the U.S. FDA or World Health Organization.

Please see the [U-M Health Response Website](https://healthresponse.umich.edu) for additional information, including FAQs.

**Accountability and Violations**

Individuals not in compliance with this policy may be subject to the following: inability to participate in University activities; administrative consequences; accountability actions; disease testing; and/or disciplinary procedures.
