**INSPECTION TYPE:**

Follow Up Critical

Violation Category	Repeat	Violation Description/Remarks/Correction Schedule	Correct By	Corrected
--------------------	--------	---	------------	-----------

**Corrected**

4-501.114		A chemical SANITIZER used in a SANITIZING solution for a manual or mechanical operation shall meet these limits or as otherwise approved: (P)	11/09/22	11/16/22
Kitchen		Chlorine ppm pH<10 pH<8		
Kitchen		25 120 F 120 F		
		50 100 F 75 F		
		100 55 F 55 F		
		Iodine a concentration of between 12.5 and 25 ppm and minimum temp of 75 F and pH of 5 or less or meets manufacturer's specifications. (P)		
		Quats minimum temperature of 75 F, hardness of 500 ppm or less and meet manufacturers use directions. (P)		
		<b>Item(s):</b> Other chemical sanitizing solution concentration(s)		11/16/2022
		<b>Problem(s):</b> Not used according to manufacturer's label instructions		11/16/2022
		<b>Correction(s):</b> Use according to manufacturer label directions.		
11/9/2022		A chemical sanitizer other than chlorine, iodine, or a quaternary ammonium compound shall be applied in accordance with the manufacturer's instructions.		
		Observed the Smartpower Sink and Surface Sanitizer dispenser above the prep sinks with an insufficient quantity of product in the container to achieve the proper concentration per the manufacturer's label. The product was measured to be at 0 ppm lactic acid.		
		Correct as soon as possible by replacing the empty container with a full container of sanitizer so that the chemical sanitizer is able to achieve the proper concentration.		
11/16/2022		CORRECTED: The empty container of sanitizer was replaced with a fresh bottle and the dispenser was able to yield a solution within the manufacturer's instructions between 704 and 1875 ppm lactic acid.
