| 3-304.14 Core Item(s): Wiping cloth(s) Location: hand wash sink(s) Sanitizer Problem(s): Not completely submerged in sanitizing solution Less than Correction(s): Store wiping cloths completely submerged in sanitizer. 12/1/2022 In-use wet wiping cloths shall be held completely submerged in a sanitizing solution between uses. Observed the sanitizer bucket behind the hand washing sink on the front line with wiping cloths not fully submerged in sanitizer. The small sanitizer bucket had multiple wiping cloths in it which prevented the top cloths from being fully submerged. Correct as soon as possible by storing wet wiping cloths completely submerged in a sanitizing solution between uses. To ensure the above, sanitizing buckets should be filled at least halfway or greater with sanitizing solution, and one wet wiping cloth per sanitizing bucket is optimal to achieve best results and proper sanitization. In addition, wiping cloth shall be replaced with a clean wiping cloth once it has become soiled.

12/1/2022
Nonfood-contact surfaces of equipment shall be cleaned at a frequency necessary to preclude accumulation of soil residues.

Observed the front line display cooler with excessive accumulation of debris near the backside sliding door and in the vent slats.

Correct as soon as possible by cleaning the nonfood-contact surfaces of the above mentioned equipment to sight and touch on a regular basis to prevent harborage conditions and accumulation of food, debris, and other contaminants.
